

Stena Aluminium AB's suppliers are expected to take reasonable measures to ensure that parts and products that are delivered to Stena Aluminium AB do not originate from Conflict-Affected and High-Risk Areas, i.e. does not contain conflict minerals or cobalt that favors armed groups or contributes to human rights violations. This means that no such parts or deliveries comprise cobalt or conflict minerals, which are defined as:

- (i) tin
- (ii) tantalum
- (iii) tungsten
- (iv) gold
- (v) all derivatives from the above

The aim of this policy is to ensure that Stena Aluminium AB's products do not, either directly or indirectly, finance or benefit armed groups or contributes to human rights violations by means of mining operations or the trade in minerals in Conflict-Affected and High-Risk Areas. Stena Aluminium AB expects its suppliers to formulate policies, long-term guidance and management systems in accordance with the guidelines OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, which have been formulated to meet this goal, to the extent they deem suitable for the individual business.

Stena Aluminium AB does not buy any materials, as raw material or any other type of input goods, classified as conflict mineral. For cobalt and the metals specifically pointed out above, these are elements that are not expected, in any way, to be a part of Stena Aluminium AB's products, rather, from our perspective, they are considered as unwanted. Therefore, the problem as such is not relevant for Stena Aluminium AB.
